

Greenly Truemist Twister

TrueMist Twister - Dual mode Tap Water saving Nozzle converts low pressure water flow into mist form in taps and dispense water in such a way to maximize water utilization there by saving up to 90% of water from taps. Just a twist to save water.

Features:

- Mist flow mode dispense 700 ml per minute (Saves 90%)
- Shower / Spray flow mode dispense 3.5 litres per minute (Saves 60% water)
- Just a small twist between mist and Spray mode.
- Can be retrofitted in any standard 22 mm Diameter Tap (M22/F24 threaded taps).
- No Tap replacement needed.
- Works both in Pressure-less Water piping system and Pressurized water system.
- Solid construction using Brass material.
- Ergonomic Design & Anti rust proof
- Easy installation and maintenance
- Simply unscrew existing aerator and replace with Greenly Truemist Twister (Refer Instruction manual).

Mist Mode is best for vegetable wash, Handwash, mild soiled plates wash.

Shower / Spray Mode is best for Filling glasses, Vessel wash, Higher water quantity applications.

Adjustable Flow Function: Depending on the installation, the product might not function in the Mist Mode by default and the initial water spray might be uneven. Please let the water run for a few minutes after installation. Ensure that the adjustment valve is turned clockwise all the way. Turning it clockwise will eventually bring the nozzle to the Mist Mode. Leave it there for the Mist Mode, or turn it anti-clockwise about 20 to 60 degrees to switch to Shower Mode. Twist back clockwise 20 to 60 degrees to return to Mist Mode. Please avoid any further turn anti-clockwise as it may break the screw or threads inside the assembly.

Warranty: If you are not satisfied with this product or if the product is found defective upon first use, please have it shipped to the returns address listed on the product website www.greenly.co.in for a full refund or replacement. Greenly will not compensate for return shipping, but will ship a replacement for free, if the complaint complies with warranty claims. Please include order and purchase details like date of purchase, order number, and shipping details. Greenly brass water saving nozzles are under manufacturing defects warranty for a period of two year from the date of purchase. The warranty is void if the product has not been correctly installed or used for purposes other than what it is designed and intended for. The Product may require periodic cleaning to remove any general water impurities, or calcium deposits (depending on water source) that might require soaking the product in vinegar overnight followed by a rinse to gently remove any such deposits. The warranty does not apply if the product is improperly cleaned using abrasive or corrosive cleaners. Moreover, the warranty does not cover costs for third parties or damages or for any other costs over and above the cost of the product itself.

Maintenance: Use non-abrasive non-toxic cleaners to gently wash the product. Do not use lime removal products, alkaline products, acidic products, or cleaners containing alcohol. It is recommended to uninstall the product periodically and wash away any water borne deposits that might have accumulated over use. General periodic cleaning should in most cases be sufficient to keep the nozzle from functioning at best capacity. However, depending on the source water used, such deposits might need soaking in vinegar overnight and a more aggressive wash and clean to dislodge and restore functionality.

Greenly Truemist Twister Installation Guide

Tools Required

1. 22mm Spanner or Compatible Wrench

Pre-requisite

1. Check the size of the Threads.
2. Nozzle comes with M24 Thread(Outer Thread).
3. Nozzle fits directly into taps with F24 Threads (Inner).
4. **For taps with **M22, F20 & F18 Size**, Adapter is available in retail Pack.

For other tap size, Contact our nearest outlet or Customer Contact Center.

Use the Spanner or Wrench, Remove existing nozzle or aerator by turning Anti-clockwise direction. Remove the Aerators along with Washers.

For Taps with F24(Inner) Threads, Place the Washer above the Nozzle and insert into the Tap.

* Due to various manufacturers standards, New washers in this pack may not suit. Existing washer should be used.

Fix the Spanner and Rotate Clockwise. Tight enough to fix it firmly.

Taps with outer Threads

For Taps with M22(Outer) Threads, Place the adapter & Washer above the Nozzle and insert into the Tap and Fix it well.

Turn the Knob Anti-Clockwise for Shower Mode

Open the Tap & Turn the Knob Clockwise for Mist Mode

Output:

Mist Mode - 0.7 LPM @ 1.5 bar
Shower Mode 3.5 LPM @ 1.5 bar

- Works in pressure-less water systems without flow restrictor.
- Flow restrictor may be required when the water pressure is above 2.5 bars or when the nozzle sprays water out of the faucets.

** Pressure regulator and additional adapters are available only on retail pack
